BRADLINK WINS HOUSTON AIRPORT SYSTEM PROGRAM MANAGEMENT CONTRACT

HOUSTON, TX – Bradlink is excited to announce a new contract award to provide program management for the Houston Airport System – the fourth largest airport system in the United States and the sixth largest in the world. Bradlink, along with Joint Venture partners, AECOM, Louis Berger and Omega Engineers, will provide program management for major terminal and airside infrastructure capital improvement projects involving George Bush Intercontinental IAH, Hobby, and Ellington airports. Such projects include oversight, design support and program management of enabling and apron projects to support United’s Terminal B expansion.

Bradlink’s specific scope includes design management for Terminal B, Process Controls administration, and MWDBE project management and oversight. Helen Callier, President of Bradlink stated “We are grateful to be a partner on the Houston Airport Program Management Team. The Houston Airport System plays a vital role in the Houston region and world platform and it is great that Bradlink along with their Joint Venture partners are playing a key role in creating the ultimate passenger experience.”

About Bradlink LLC

Established in 2004, Bradlink LLC, with offices in Dallas and Houston, TX, is a Technical Services firm providing three core services: Technical Support, Information Technology and Operations and Maintenance Support. Recognized in 2011 as a top minority owned business with the Emerging E-10 award from the Houston Minority Supplier Diversity Council, Bradlink is branded as a go to resource in Transit and Aviation and continue to strive to serve as a seamless team member to our agency and large prime clients. With 20 employees, Bradlink is a niche firm that moves quickly and smart to provide client technical service solutions and assist in making improvements.
